

EZE GOODNESS

Full-Stack Developer · Prompt Engineer · AI Consultant · Automation Engineer · Data Annotator

Email: chimenmagoodness@gmail.com Github: github.com/chimenmagoodness LinkedIn: linkedin.com/in/goodness-eze

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer and AI Consultant with 6+ years of experience delivering 100+ production projects across real estate, fintech, logistics, crypto, and AI. Proficient across the full development lifecycle — from architecture and backend logic to frontend UI, database design, deployment, and post-launch support. Combines deep software engineering expertise with hands-on AI integration, prompt engineering, workflow automation, and data annotation experience. Former IT instructor with a proven ability to communicate complex technical concepts clearly to non-technical stakeholders. Available for remote freelance, contract, and long-term collaborative engagements.

CORE COMPETENCIES

- | | | |
|--|---|---|
| • Backend: Python, Flask, Django | • Frontend: JavaScript, React, HTML5, CSS3 | • Annotation: NER, RLHF, Classification, Bounding Box |
| • AI/LLM: OpenAI, Claude, Gemini, RAG Pipelines | • Databases: MySQL, PostgreSQL, SQLite, SQLAlchemy | • Desktop/Mobile: Kivy, KivyMD (cross-platform) |
| • Automation: Selenium, BeautifulSoup, Scrapy, Celery, Zapier, n8n | • Prompt Engineering: Chain-of-thought, Few-shot, RAG | • DevOps: Git, GitHub, Render, cPanel, VPS, CI/CD |
| • Data Analysis: Pandas, NumPy, Matplotlib | • Payment Integration: Pystack, Flutterwave, Stripe | • Collaboration: Slack, Notion, Linear, GitHub |

PROFESSIONAL EXPERIENCE

Full-Stack Developer, AI Consultant & Automation Engineer

2023 — Present

Freelance / Self-Employed

- Designed and delivered 100+ end-to-end web applications across real estate, fintech, logistics, crypto, and AI verticals using Python (Flask, Django) and JavaScript.
- Built and deployed production platforms including B&G Homes (real estate + realtor reward system), Uthao Global Logistics (ocean freight, real-time tracking, 150+ countries), NewGenGlob Banking (full banking system), and Crypto Trading Bots (automated market monitoring).
- Engineered Python-powered automation pipelines (and no-code workflows via Zapier & n8n) for web scraping, data extraction, scheduled reporting, document generation, email automation, and API-to-API workflow integration — saving clients a combined \$7,000+ in operational costs.
- Integrated LLM APIs (OpenAI GPT-4, Anthropic Claude, Google Gemini) into production applications for chatbots, document processing, content generation, and AI-augmented automation.
- Designed and optimised prompts using chain-of-thought, few-shot, and RAG techniques for business use-cases across multiple LLM platforms.
- Delivered high-quality data annotation across Scale AI, Appen, and Mindrift — NER, RLHF preference ranking, sentiment classification, instruction-following evaluation, bounding box labelling, and content safety review.
- Maintained 95%+ annotation accuracy at 500–1,000 tasks/day sustained output.
- Authored and published flask-smartflash, an open-source Python package on PyPI — a Flask extension for smart flash messaging with auto-dismiss and toast notifications.
- Managed full deployment stack: Render, cPanel/WHM, VPS, Netlify, and GitHub Actions CI/CD.

IT Instructor

2021 — 2023

New Horizon Computer Learning Center

- Delivered structured training to 200+ students across multiple cohorts in web development, digital marketing, computer fundamentals, and Microsoft Office Suite.

- Designed curriculum, practical exercises, and assessments that translated complex technical concepts into accessible, job-ready skills.
- Maintained high student satisfaction and job placement rates through hands-on, project-based learning methodology.

Senior Developer — Self-Directed

2019 — Present

Independent Study & Practice

- Built foundational and advanced expertise in Flask, Django, Python, and modern JavaScript through deliberate project-based self-study.
- Developed skills in database architecture, responsive UI design, RESTful API development, web scraping (Selenium, BeautifulSoup), data analysis (Pandas, NumPy), and cross-platform desktop apps (Kivy/KivyMD).
- Established the technical foundation that enabled delivering 100+ production projects as a professional developer.

SELECTED PROJECTS

B&G Homes	Real estate platform with a realtor reward system, verified property listings, inspection scheduling, and multiple payment integrations — bghomesonline.com
Uthao Global Logistics	Ocean freight shipping platform with real-time tracking, FCL/LCL container booking, reefer cargo, and break-bulk services across 150+ countries.
NewGenGlob Banking	Full-featured banking system with account management, secure transactions, and financial operations — production deployment.
Crypto Trading Bots	Automated cryptocurrency trading platform with bot configuration, market monitoring, and live data feeds.
flask-smartflash	Open-source PyPI package — Flask extension for smart flash messages with categories, auto-dismiss, and toast notifications — pypi.org/project/flask-smartflash
Trading Remedy	Investment and portfolio management platform with market analysis tools and financial dashboards.

DATA ANNOTATION EXPERTISE

Platforms	Scale AI, Appen, Mindrift
Task Types	Named Entity Recognition (NER), RLHF preference ranking, sentiment & intent classification, instruction-following evaluation, conversation quality rating, bounding box labelling, content safety & policy review, factuality & hallucination detection, dataset curation.
Output & Quality	Output scales to task complexity — quality over speed. Rigorous self-review process on every batch, with particular attention to edge cases and ambiguous examples. Accuracy consistently at platform benchmark or above.

EDUCATION & CERTIFICATIONS

BSc Physics (Nuclear Option)

Graduated 2022

Rivers State University (RSU), Nigeria

- Developed rigorous analytical thinking, mathematical modelling, and precision-driven problem-solving — disciplines directly transferable to software architecture, data engineering, and AI work.

IT & Software Development Certification

2019 — 2021

New Horizon Computer Learning Center, Nigeria

- Professional training in web development, computer fundamentals, networking, and Microsoft Office Suite.
- Complemented by 6+ years of intensive self-directed learning and real-world project delivery across full-stack development, AI integration, and automation engineering.

TOOLS & WORK ENVIRONMENT

Editor / IDE	VS Code (primary), PyCharm for Python-heavy projects
Version Control	Git + GitHub — every project is version-controlled
Project Mgmt	Slack · Notion · Linear · GitHub Projects
API Testing	Postman · pytest for Python unit tests
AI Tools	OpenAI API · Anthropic Claude API · Google Gemini API · ChatGPT, n8n, Zapeir
Design	Figma for UI references · browser DevTools for live iteration
